BUILDING NOTES

The Me-410 was Messerschmitt's successor to the Me-110. The model is finished in the kit decals and represents an aircraft flown by 8./ZG26 in 1943/1944.

The kit is highly detailed and very well engineered for ease of construction. The kit was built out of the box and only extra detail was the addition of a rear gunner figure. The kit was finished in Testors model master enamel paint.
