

**GERMAN PANTHER D TANK W/ZIMMERRETT
DRAGON 1/35 SCALE KIT
MODEL BY RICHARD LOBINSKE**

This kit was a mostly out of box build. The model was brush painted with Testors water base colors. A rough, stubby brush was used to replicate a rushed, brush-applied camouflage pattern. A layered drybrush of tan and buff were used for weathering. Small shears were used to tear one of the metal skirt plates to replicate damage and the chain included in the kit was used for the field repair to hold the skirt in place.
