

**HO SCALE ATLAS 3 STALL ROUNDHOUSE
MODEL BY MIKE ASHEY**

This ATLAS kit has nice surface brick detail and a lot of parts. The foundation lower walls were represented by individual panels that had some minor fit challenges. The roof is in 3 sections and one section had to have its edge trimmed off by about 1/16 of an inch to get it to fit correctly. The kit was airbrushed with Testors enamels and weathered with pencil pastel dust.
