

# **MIKE ASHEY PRODUCTIONS**

**1/700 SCALE BUTLER CLASS DESTROYER ESCORT  
MANUFACTURER : SKYWAVE  
MODEL BUILT BY : MIKE ASHEY**

## **KIT DESCRIPTION AND BUILDING NOTES**

This Skywave 1/700 scale Butler class destroyer escort measures a little over 5 inches long. I added some photoetch details such as railings, depth charge racks, radars and 20mm guns. The trick on these small scale kits is to paint them with various shades of paint so that the appearance of the model is enhanced making it easy for the eye to pick out details. The water was achieved with acrylic gel medium painted and highlighted with water base paints. Setting the model at a slight angle plowing through slightly rough seas also enhances its appearance.
