

REVELL USS FRANKLIN D. ROOSEVELT, CV-42
SCALE: APPROXIMATELY 1/547
MODEL BY MIKE ASHEY

This kit was released by Revell in 1954. Like most of their early ship kits it had a flat hull bottom just below the waterline. The Revell Saratoga kit has a full hull and the scale is almost the same - 1/540. I cut off the lower hull from a Saratoga kit, modified it and the FDR hull and then grafted the Saratoga lower hull onto the FDR upper hull. Gold Medal Models photoetch was used for the detailing and the kit was painted with Testors enamels.
